

Lets' save our planet !

Water is a precious resource, sometimes even a luxury in some countries, so let's save it!

During a hotel stay, a guest consumes an average of 400 liters of water per day. So you might as well avoid letting the water run during tooth brushing, using a tooth glass saves 10,000 liters of water per person per year.

Washing a towel requires a significant amount of water, electricity and detergent. So you might as well change it only when it's necessary! We can keep the towels for several days (if you want to keep them, leave them on the towel rack) and/or hang the green card from your door handle.

In addition, we have equipped our new junior suites with bamboo towels and bathrobes; less water-intensive to grow than cotton, bamboo is also less energy-intensive to maintain (faster drying), and towels are softer.

At Hotel Sacha we chose the shower rather than the bathtub. A shower consumes 5 times less water than a bath (50/250 liters). In addition, some of our showers are equipped with a head that changes color depending on the volume of water used, for better awareness!

Please note that the toilet bowl cannot accommodate waste (tampons, diapers, medicines) that alters the operation of the wastewater treatment plant and may be poorly degraded into the natural environment.

The Sheets

In case of long stay, your sheets will be changed every 3 days unless you give other instructions at the Reception.

Our waste is also increasing!

According to different sources, a hotel restaurant produces about 5.5 m³ of waste per year per room. Add the wastewater, you will arrive at about 90 m³ annually per room. Our establishment sorts waste, help us. We can reduce our waste at the source (choose products without too much packaging).

Think about selective sorting

You can deliver your specific waste directly to the reception

Quality filtered water

In order to reduce the use of plastic bottles, we have equipped ourselves with a pure, micro-filtered water fountain: as a result, the Castalie water bottle that you will find in your room is prepared on the spot.

Moreover, it is reusable and guaranteed BPA-free; please leave it in your room when you leave.

We will also be happy to refill your water bottle on request at the reception.

Without energy, no life!

Our hotel is equipped with low-energy bulbs and motion detectors in corridors and staircases.

When you leave your room, don't forget to remove your card from the contactor in order to turn off all the lights with a single tap. The sockets are not connected, so you can leave your devices to charge if necessary.

For information, turning off the tv watch at night generates a saving equivalent to its operation during 2 movies.

A secret to share with you!

In our tree-lined courtyard, our plants benefit from a natural fertilizer: the grounds of fair trade and organic coffee that you drink for breakfast...

And yes, you are not the only ones who appreciate the quality of our coffee 😊!
